

SAT AI SOLO™

There is no substitute for speed

powered by **SAT** Smart Acquisition Technology™

NLT's SAT-AI is the first of its kind to provide hands free ingest of IT based MXF media for Avid Workgroups. Now SOLO provides the same capability for stand alone Avid Editors.

NL Technology introduces **SAT AI SOLO™** the best automated IT workflow solution for moving MXF media and metadata into the Avid® Media Composer. Copy digital content from optical, flash or disk to local Avid storage. Accelerate collaboration with worry free clip based management of associated media files, sequence creation.

Compatible with **FieldPak®**, **XDCAM™**, **P2™**, **GFCAM** and other MXF media, **SOLO™** will move, check-in and archive footage at the facility or in the field.

Return the empty flash or disk media to the videographer for reuse quicker than ever.

Do less, Get more

SOLO Features:

- Seamless integration with Avid Media Composer Bins
- Hands free operation, no editor required
- Automatic Avid sequence generation
- Supervised mode provides local media cache with manual review and check-in
- Instant rename and renumber clip names
- Add and modify all metadata
- Optional - automatic clip based archive to LTO tape

Benefits:

- Automatically move acquisition media to the collaborative workgroup for editing
- Receive and use all metadata from acquisition media
- Keep a backup copy on LTO tape or local disk storage cache
