SAT Proxy™

There is no substitute for speed

powered by SAT *Smart Acquisition Technology™*

NLT's SAT Proxy provides dual format acquisition, DV25 and the highest quality Proxy video. Get an exact copy of the DV25 in Windows Media formatted files.

SAT Proxy is an optional hardware codec that creates Windows Media™ audio and video files. The media files can be viewed with any Microsoft Windows Media Player that supports Windows Media 9.0 or greater.

- *Compatible with SAT-2000 TranSport and Ikegami DNS-33W Cameras*
- *Get instant access to the DV25 and Proxy video*
- *Keep a proxy copy of everything you shoot*

Features:

- **Fastest workflow** by eliminating time consuming digitizing, or re-encoding to a lower bit rate for distribution
- Uses **NLT FieldPaks®** and Thumb drives
- **Compatible** with Windows Media™ Player
- **Sort with Metadata,** use the browser or Window Media™ Player to sort the proxy files easily
- **Share Proxy** with staff members with USB memory sticks, CDs, DVDs, or internet
- **Identical Metadata** saved with DV25 and the proxy video
- **Synchronized timecode** between DV25 and the proxy video
- **Selectable video bit-rate** allows user to choose video quality
- **Selectable screen size,** full screen video or quarter screen for email or web-site use
- **Transfer** hours of video in minutes
- **Thumb Drive support,** Plug in and copy off proxy; plug into **SAT-ProxyTools**, to move and rename files, all automated

Windows Media™ Compatible

Simultaneously create Windows Media™ formatted content as a proxy while recording DV25 content

Benefits:

- **Keep a copy of every play**, practice and game, in Proxy video files
- **Everyone** can watch Proxy video for free
- **Interoperability** using Windows Media standard file format for network distribution
- **No generation loss,** proxy video generated from the uncompressed acquisition
- **Small File sizes,** record up to 15 times more video than DV25 at the best video quality
- **Lightweight proxy files**, for viewings over standard local area networks or internet ready
- **One acquisition device,** multiple video files: DV25 & Proxy

ProxyTool

SAT ProxyTool Software:

- **Auto-detect** FieldPak or Thumb Drive
- **Automated Transfer video** to PC or laptop
- **Seamlessly name video files** from Log data
- **Automatic Windows Media Player Playlists** generated; grouped by metadata and clip names
- **Auto-launch** Window Media Player
