

## SAT 2000 TranSport™

There is no substitute for speed

powered by **SAT** Smart Acquisition Technology™

**NLT's advanced technology tapeless digital video recorder revolutionizes Sports non-linear acquisition process.**

The TranSport, powered by SAT Technology, targets the needs of sports teams by providing a faster, more powerful process for capturing video and acquiring data by recording digital and staying digital through-out the editing process.

Compatible with industry-standard cameras, the TranSport captures analog video direct to disk with no generation loss. With an easy-to-use color touch screen interface, the TranSport is the DVR of choice in the industry.

### Features:

- **The only recorder** in the industry with embedded sports metadata and Proxy
- **Provides interoperability** with leading non linear editing systems
- **Thumb Drive support** for proxy video, **SAT-PakTools** and **SAT-ProxyTools**
- **Mark video clips** while shooting, streamline editing with pre-marked video clips
- **EOP** marks the end of play, tags scoreboard and play as one clip
- **Proxy (Option)** Simultaneously record DV25 and Windows Media™ video content
- **Continuous media record**, pause record between plays
- **SAT-FieldPak®** compatible with all storage capacities 20GB to 160GB, and NLT's Solid State product line
- **EZ-Metadata keyboard entry** 

### Specifications:

- **SDI, Composite and Component** video input and output connections
- **4 channels** of analog audio input and output
- **26 pin** industry-standard support
- **Touch screen interface** and built-in confidence monitor, Color LCD
- **2 drive bays**, record two copies or store up to 24 hours of video storage on 2 FieldPaks
- **AC or DC power**

**Video file format with enhanced sports logging of play marks and metadata**

### Benefits:

- **Fastest workflow** by eliminating time consuming digitizing, logging and labeling video on the editor
- **Live Logging** provides the quickest way to edit, using metadata for sorting, searching and locating
- **Ready to use DV25** and Proxy video, plug and play – MXF editors and WMV player
- **Highest Quality digital**, professional video and Proxy with no generation loss
- **Review/Playout video** on the color display
- **Large capacity recording** over 12 hours of DV25 quality video on a 160GB FieldPak
- **Video File Formats:** XOS OMF & MXF
- **Field proven technology**
- **Interoperability** using **MXF** standard file format supports multi-vendor workflows

Simultaneously create Windows Media™ formatted content as a proxy while recording DV25 content
