SAT-FieldPak®

Safe, Reliable, Removable Storage

New: 160GB Capacity – Holds over 12 hours of DV25 video.

The FieldPak®, a core component of the SAT technology, targets the needs of the video production industry by providing a faster, more powerful technology for storing video and data.

Compatible with industry leading editing systems, the FieldPak can be instantly accessed using standard computer interfaces such as SCSI, High-Speed USB and 1394.

With the industry's largest acquisition storage capacity and complete portability, the FieldPak is the media of choice for nonlinear acquisition in the industry.

Video file format with enhanced sports logging metadata and play marks

Windows Media™ Compatible

Simultaneously store Windows Media™ formatted content as a proxy while recording DV25 content

Features:

- **Provides interoperability** with leading non linear editing systems

- **Provides 1.5 to 12 hours** of media recording time using the DV25 format; available in 20GB, 40GB, 60GB, 80GB, 120GB and 160GB capacities

- **Stores professional quality** media recorded from any digital media source

- **Provides instant access** of the video and audio captured using the SAT-Adapters

- **Protected Hard Drive** with the patented Shock Suspension System

- **SAT-PakTools software,** Fieldpak management tool for formatting, metadata and system updates for Camera/TranSport

- **High speed data transfers**

- **Small and compact**, fits in a shirt pocket
  - dimensions: 1 x 3.25 x 5 inches
  - weight: 5 oz

Benefits:

- **Rugged** construction, withstands environmental extremes: vibration, humidity, temperature, and is consistently dependable

- **Field proven** and reliable media, over 6 years of use in the field

- **Large capacity** can store 1.5 to over 12 hours of DV25 video, and over an hour of Avid's DNxHD™

- **All digital media** allows for an infinite number of copies without generation loss

- **Reusable FieldPaks** provide years of operation without loss of video quality

- **Quickly transfers** video and data to a server or workstation, using SAT Adapters

- **Works** with industry-standard computers and operating systems: Windows 2000, Windows XP, and Mac OS 10.4 and maybe Windows Vista
